

The boundaries of the regular blocks are 4,800 international meters on a side and contain 2,304 hectares. The regular boundaries are defined in terms of X and Y coordinates of the Universal Transverse Mercator Grid System based on the Geodetic Reference System (GRS) 1980 Ellipsoid.

Areas and dimensions of the irregular blocks along the zone boundary are as indicated.

Supplemental Official OCS Block Diagrams have not been published for blocks adjoining the approximate (short dashed) Limit of "8(g) Zone". Coordinates and areal measurements for these blocks are not considered by the MMS to reflect an official Federal position.

This revised diagram supersedes protraction diagram NORTON SOUND NP03-01, approved 03-JUN-2003.

Copies of these diagrams and other information may be obtained at the appropriate MMS OCS Region or from <http://www.mms.gov/ld/maps.htm>.

This diagram is prepared in accordance with 30 CFR 256.8
